

Rule Change 2103

The following rule change was proposed by Commissioner Jeff on 13-August-2021 and approved by the Fantasy Board of Governors on 14-August with yea votes from governors Sidoriak, Perlmutter, Seipel, and Johnson.

Modify Section 7F5 of the Official Rules to include the language in blue.

Based on the size of the league, there may be bye weeks during the regular season and/or playoffs. Points scored during a regular season bye week will count toward that team's season point total. [There may also be games versus the weekly league average.](#)
[The weekly league average score will not be rounded to a whole number.](#)

Commentary from Commissioner Jeff:

Playing games against the league average allows us to have an uneven number of teams in the league and still avoid bye weeks or triple threat matches.
